Window fans for air extraction and ventilation for commerce

- A sufficient exchange of air must be ensured wherever people gather or work. This is essential in particular in shops with large display window areas and thus heating. EVN or EV, EVR, EVH window fans are a clever and low-cost solution for the ventilation issues arising in such cases.

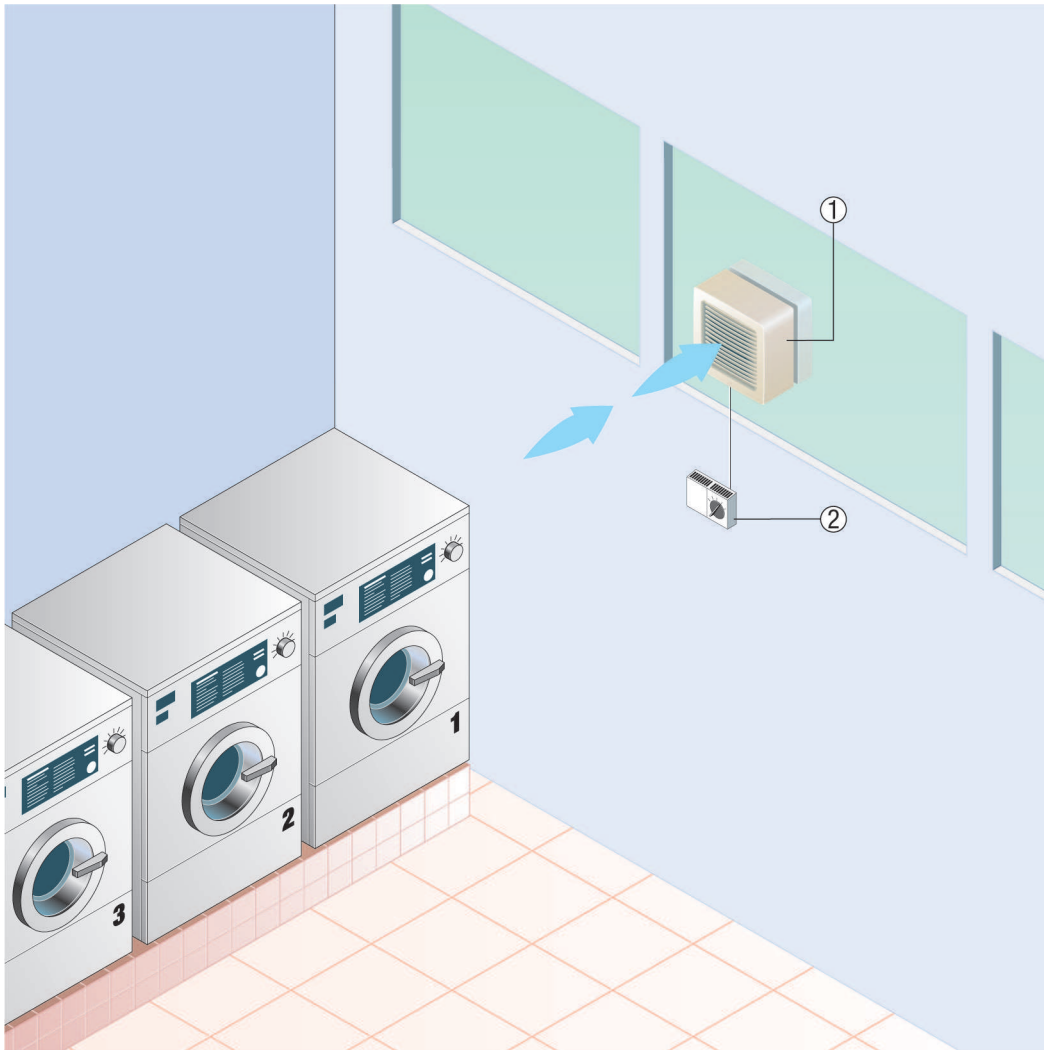

- ① Inside of window fan
- ② Window pane
- ③ Outside of window fan with shutter

Air extraction from damp rooms

A combination of hygrostat and fan ensure a pleasant and healthy indoor environment by regulating the air humidity. By countering permanently increased air humidity levels, the hygrostat and fan prevent the damaging formation of mould.

INSTALLATION INSTRUCTIONS

EVN 22

- ① Window fan
- ② Hygrostat
