

FUNCTIONAL DESCRIPTION

Centro-H

Centro system for centralised ventilation, in accordance with DIN 18017-3

Application areas:

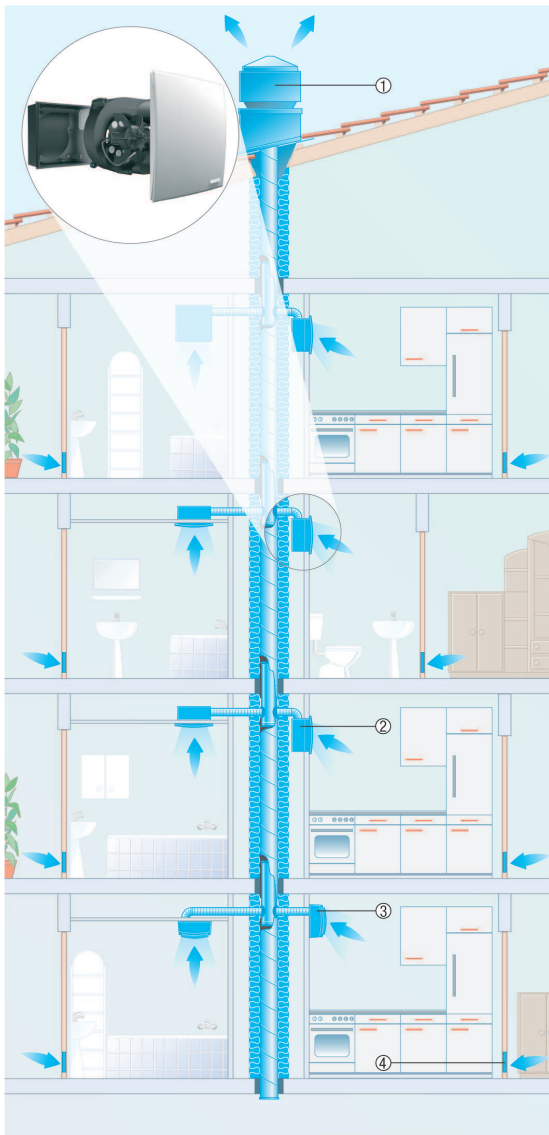

- Multiple family units, bathrooms, WC, kitchens, storage rooms

Fire protection

- All the fire protection systems listed below also function in combination with the Centro system for central ventilation:
 - aeroduct
 - Ceiling barrier system
 - System with fire-proof shaft
 - Air extraction without fire protection

Functional description

- A **central fan on the roof** extracts stale, moist air through the exhaust air elements in the bathroom and kitchen. Outside air flows into the apartment draught-free via supply air elements.
- The pressure controller keeps the central fan's airstream pressure constant.

FUNCTIONAL DESCRIPTION

Centro-H

- ① ERD centrifugal roof fan or GRD centrifugal roof fan with EC motor
- ② ER-UP recessed-mounted housing with recessed-mounted Centro exhaust air element
- ③ Centro surface-mounted exhaust air element
- ④ MLK door ventilation grille

Main system components

Recess-mounted exhaust air element

ER-UP.. recessed-mounted housing

Surface-mounted exhaust air element with surface-mounted housing

GRD centrifugal roof fan including pressure controller

FUNCTIONAL DESCRIPTION

Centro-H

Centro-P.. pressure controller when using another exhaust fan (e.g. ESR)

ALD outside air opening
