

E-SM

E-SM EnOcean module

- The "E-SM" EnOcean module is a communication expansion board, which allows external EnOcean wireless sensors and/or EnOcean wireless step switches to be taught in on the controller of your controlled domestic ventilation unit.
- The "E-SM" communication module is designed for the European market and transmits data in the 868.3 MHz frequency band.
- The EnOcean Equipment Profiles (EEP) currently supported can be found in the EnOcean EEP list below.

EnOcean-EEP list

Type	Manufacturer	Designation	EEP
Humidity temperature	Afriso	FTM TF	A5-04-01
Humidity temperature	Thermokon	SR 04 rH	A5-04-01
CO2 temperature	Afriso	CO2 sensor	A5-09-08
CO2 temperature	Thermokon	SR 04 CO2	A5-09-04
4-channel wall transmitter	PEHA	FU-BLS Aura design	F6-02-01
